Beginning in late June and
continuing into August, Actua
spreads the love of science,
technology, engineering and
mathematics (STEM) through
week-long summer camps.
Actua is a national youth
outreach network representing
36 university and college-
based members.

"We've been operating in
Nunavut for almost 20 years
now," said the organization's

manager of education and
outreach Jenifer Spencer.
Spencer says there are a few
more camps this year and,
with the addition of Grise
Fiord to the roster this sum-
mer, that makes a total of 24
communities.
"We haven't gone to Sani-
kiluaq, yet. We're definitely
hoping to. We're always look-
ing to build new relation-
ships."
– Michele LeTourneau

The Cambridge Bay Actua camp, held July 10 to 13, offered campers the opportunity to take a tour of
the new Canadian High Arctic Research Station thanks to Actua's partner, Polar Knowledge Canada.
Campers: Sarah House, Sandy Bellrose, Andrew McKenna, Waldon House, Kevin McKenna, Sophie Hanil-
iak, Annie Bellrose, Sheyenne Kemukton, Bethany McKenna, Aliyah Komak, Kaylee Aknavigak-Kaiyogana,
Dina Kameemalik, Silas Nicoll, Ryan Ohokak, Graysen Maniyogina, and Chantel Haniliak. Instructors:
Mackenzie Holding, James Hudson and Chloe Houle-Johnson.

Deryk Sandy, Johnson "Julian" Krako and Orren
Makpah record their daily observations in their
science camp field journals in Rankin Inlet June
25 to 29.

Iqaluit's Pearl Uluqsi examines a collected speci-men in July.

Eunice Kalluk draws a picture of one of the spe-cies campers "captured" during Actua's Dive Into It
activity in Resolute Bay July 2 to 6.
